Objectives

To work as a .Net developer/Team Lead in a position in which I can learn, grow and contribute.

Summary

More than 8 years programming and application development experience.

Languages

- ▶ Persian – Mother tongue
- ▶ English - Fluent
- ▶ German - Good
- ▶ France - Weak
- ▶ Turkish (Azerbaijani) – Just speaking

Experience

.Net Team Lead - (Nov-2007 – Now)

Emirates Group IT (Mercator)

Emirates Group IT (EGIT) is the IT department of Emirates Group. Main focus of EGIT is developing software's required in Emirates Airlines. Beside developing software's for Emirates Airlines, the company provide different software's for more than 40 international airlines.

The project in which I am involved is Direct Operation Cost System. DOC project is a SOA application used to report actual cost of a flight. About 40 people are working in this project and 2 years development time was estimated for the project. We are working on .Net framework 2.0 and backend database is Oracle 10g. In this project I am responsible for developing functional design, unit test plan, technical design and validating the codes which are implemented by developers (Code review).

Technical Manager - Developer (Jun-2006 – Oct 2007)

SAHBA IT Leaders

The company is working on custom software development and provides solution mainly using Microsoft's

technologies. The company is focused on different kind of applications including Desktop applications, Web applications, Enterprise applications, Access Control applications (using RFID and image processing) and applications for GPS. I was one of cofounder of the company. In the company I was Manager of developers' team and also member of development team which was responsible to develop applications. Primary choice of development language in company used to be C# but sometimes VB.net was also used. We seldom needed to use C++ to implement some low level programming as needed. We had have started working in mobile platforms 3 months before I quit and were working on some mobile applications that work on MS .Net Compact Framework 2.0.

Developer (June 2004 – March 2007)
Iran Power plant Investment Company

Developing required software in the company on the .Net framework and mainly using C# as primary language. The applications which were developed include web based, Desktop and distributed applications. MS SQL 2000 was main choice in many applications but MYSQL was also used in some projects.

Developer (August 2000 – March 2004)
PAZIRESH NOVIN

Developing applications for the company using C++ and VB 6.0 and after a while using .Net framework and C#. Working with MS SQL 2000 and MS Access. Using VBA in some applications.

Skills

Proficient in :

- ▶ Microsoft .Net Framework(version 1.1, 2.0)
- ▶ Microsoft C#
- ▶ Microsoft Visual Basic.Net
- ▶ Microsoft Visual Basic 6.0
- ▶ ASP.Net
- ▶ ASP
- ▶ XML
- ▶ SQL And T-SQL
- ▶ JavaScript
- ▶ HTML
- ▶ CSS

Familiar with :

- ▶ Microsoft .Net Framework 3.0
- ▶ Microsoft .Net Framework 3.5
- ▶ Microsoft .Net Compact Framework
- ▶ Microsoft SharePoint
- ▶ XAML
- ▶ Ruby
- ▶ Java
- ▶ PHP
- ▶ C++
- ▶ UML

Databases :

- MS SQL 2005 (Including Compact Edition)
- MS SQL 200
- MYSQL
- Microsoft Access
- Oracle 11g

Architectures :

- Desktop
- Web
- Smart Clients
- Multi-Tier
- Distributed
- SOA

Education

Microsoft Certified Professional (2003)

Microsoft Certified Solution Developer (2004)

Some Of Projects

CNG stations project control (2001)

Designer and Developer

A web based project control system

Multi layer web based (ASP, JavaScript, Com, HTML, CSS, VBA, Ms Excel, MS SQL Server 2000)

E-Commerce web site <http://www.eyd.ir> (2006)

Designer and Developer

An E-Commerce web site that sells gift

Multi layer Web based (ASP.net 2.0, .Net framework 2.0, JavaScript, XML, CSS, MS SQL Server 2005,

Web Services, VB.Net, HTML, AJAX)

Secure information management system (2005)

Designer and Developer

An online application for gathering data (text or any other file) from predefined agents.

Web based application (ASP.Net 2.0, MS SQL Server 2000, C#, HTML, CSS, XML, Crystal Reports, JavaScript)

Feasibility study of transferring data from mainframes to web (2000)

Researcher

Feasibility study of transferring data of from Mainframes and AS/400 systems which hold urban services

data.

Feasibility study of software system needed to unify providing urban services(water and waste water, power, gas, communication and post) (2000)

Researcher

Utilities service office operation, analyzer (2001)

Developer

A desktop application for gather and analyzing information about services which are being provided to customers.

Visual Basic 6.0, MS Access, Crystal Reports

Mina RSS Reader (2006)

Designer and Developer

A smart client RSS aggregator application with offline capabilities.

Visual Basic.Net 2.0, MS Access, XML, Web services, MS SQL mobile edition

Consultant Office Management System (2005)

Designer and Developer

A desktop application for recording and managing patient information and making their work paperless.

C# I.I, MS Access, Crystal reports

Online Consultant System (2005)

Designer and Developer

A web based application through which patients can submit their problems and consultants answer their problems from anywhere that is connected to internet.

ASP.Net I.I, .Net framework I.I, MS SQL server 2000, Crystal Reports

Board meeting management and automation system (2003)

Designer and Developer

A smart client application that manages whole process and information of board meetings.

.Net framework I.I, C#, MS SQL server 2000, web services, XML

Soldiers' information management system for soldiers training centers (2002)

Designer and Developer

A distributed application for managing soldiers' information those are on training in army training centers.

.Net framework I.I, Visual Basic.net, MS SQL 2000, .Net Remoting

Power plant financial assessment system (2003)

Developer

A desktop application that receives wide variety of information about a power plant, analyze them using predefined business logics and suggest optimum price for buying that power plant.

.Net framework 1.1, Visual Basic.Net, VBA, MS Excel

Production and stock management system (2001)

Developer

A desktop application designed and developed for a factory to handle its production and stock data.
VC++, Visual Basic 6.0, MS SQL server 7

Office Automation System (2004)

Designer and Developer

A distributed application for turning an office to a paperless office.
.Net framework 1.1, C#, Visual Basic.Net, .Net Remoting, MS SQL 2000, VBA

Human Resource Management System (2004)

Developer

A smart client HR application
.Net framework 1.1, Visual Basic.Net, MS SQL 2000, MS Reporting services

GPS tracking system (2005)

Developer

A desktop application that communicates with GPS devices that support NMEA standard. After receiving and analyzing data from GPS device, paints the path on the map.
.Net framework 2.0, C#, DGI+

Subsidiary companies information System for a holding company (2006-2007)

Developer

A multi layer web based application designed and developed for a holding company that has more than 170 subsidiary companies and needed to have instant access to statistical and financial information about these companies.
.Net framework 2.0, ASP.net, C#, MS SQL 2005, MS Reporting services, Web services

Online employment system (2007)

Designer and Developer

An online web site that is used for employment. <http://jobs.itleaders.ir/applicants.aspx>
.Net framework 2.0, ASP.net, Visual Basic.net, MS SQL 2000

Weblog and collaboration web site <http://friends.taslimi.ir> (2006)

Designer and Developer

A web application designed and developed for blogging and keeping in touch with friends.
.Net framework 2.0, ASP.net, Visual Basic.net, MS SQL 200

Feasibility study of creating an enterprise portal for Power and Water industry (2006)

Researcher

A research project done for ministry of Power which involved feasibility study of services and information related to power and water industry that could be offer throw web.

Web crawler and search engine (2006)

Developer

A multi layer application that crawled certain web site in defined period of time. Each web site is assigned a set of specific keywords and if crawled page contain those keywords then the page is saved in database and notification is sent to defined people. This application also provides statistical reports from crawled and saved pages.

.Net framework 2.0, C#, Visual Basic.net, ASP.net, MS SQL server 2005, MS Reporting services, Windows services.

Diary application for pocket pc running windows mobile (2007)

Developer

A handy diary application for pocket pc running widows mobile that has been developed on .net compact framework 2.0 using C# for development language and Microsoft SQL Server 2005 compact edition for database.

Iranian Electrical Industry Syndicate MIS system (2007)

Developer

A system which helps IEIS (Iranian Electrical Industry Syndicate) manage member companies information. This information contains detailed data about companies, their experiences, employees, offices and factories, activities, products and services and status of their membership fees payments. This is a web based application which was developed on .Net 2.0 platform using C# and ASP.net and MS SQL Server 2005 as database.

Other Activities

I have been doing martial arts for more than 12 years and I am also certified coach for Top karate and Kick Boxing. I have recently started a developer community in the country.

Hobbies

Martial arts, Hiking, Reading books, Being with friends(whether hanging out with them or going to party), sport, Watching films
